IN NOVA FERT
 animus mutatas
 dicere formas di,
 coeptis adspirate
 meis primaque ab
 origine mundi mea
 deducite tempora
 carmen! {16}

Ante mare et terras et quod
 tegit omnia caelum unus
 erat toto naturae vultus in
 orbe, quem dixere chaos:
 rudis indigestaque moles
 nec quicquam nisi pondus
 iners congestaque eodem
 non bene iunctarum
 discordia rerum. {12}

NULLUS adhuc mundo
 praebebat lumina Titan,
 nec nova crescendo
 reparabat cornua

Phoebe, nec circumfuso
 pendebat in aere tellus
 ponderibus librata suis, nec
 brachia longo margine
 terrarum porregerat {10}

Hanc deus et melior litem natura
 diremit. Nam caelo terras et terris
 absceidit undas et liquidum spisso
 secrevit ab aere caelum. Quae
 postquam evolvit caecoque exemit
 acervo, dissociata locis concordi
 pace ignea convexi vis et sine
 pondere caeli emicuit summaque
 locum sibi fecit in arce. {9}

Sic ubi dispositam quisquis fuit ille
 deorum congeriem sectamque in
 membra coegit, principio terram,
 ne non aequalis ab omni parte foret,
 magni speciem glomeravit in orbis. {8}

Tum freta diffundi rapidisque tumescere ventis iussit et
 ambitae circumdare litora terrae; addidit et fontes et
 stagna immensa lacusque fluminaque obliquis cinxit
 declivia ripis, quae, diversa locis, partim sorbentur ab
 ipsa, in mare perveniunt partim campoque recepta
 liberioris aquae pro ripis litora pulsant. {6}

Iussit et extendi campos, subsidere valles, fronde tegi silvas, lapidosos surgere
 montes, utque duae dextra caelum totidemque sinistra parte secant zonae, quinta
 est ardentior illis, sic unus inclusum numero distinxit eodem cura dei, totidemque
 plagae tellure premuntur. Quarum quae media est, non est habitabilis aestu; nix
 tegit alta duas; totidem inter utramque locavit temperiemque dedit mixta cum
 frigore flamma. {4}

Ver 4.13 4/8/2020

The archive includes Web
 versions with fewer glyphs.

Verajja has a full range of Latin characters so it can be used for Pali, Sanskrit, most European languages, and Vietnamese.

A full Greek character set, and a wide range of symbols extend its usefulness to other fields such as maths and science. Maths and currency symbols are designed on the figure width, while other symbols, arrows, and geometric shapes are a uniform width and align with the Caps height wherever the design permits.

Superscripts Align with Caps, scientific inferiors₂ bisect the baseline, and subscripts sit on the baseline. The default line spacing for 10 point text is 13 points.

The font includes a wide range of arrows, symbols and dingbats.
