IN NOVA FERT
animus mutatas
dicere formas di,
coeptis adspirate
meis primaque ab
origine mundi mea
deducite tempora
carmen! {16}

Ante mare et terras et quod
tegit omnia caelum unus
erat toto naturae vultus in
orbe, quem dixere chaos:
rudis indigestaque moles
nec quicquam nisi pondus
iners congestaque eodem
non bene iunctarum
discordia rerum. {12}

NULLUS adhuc mundo
praebebat lumina Titan,
nec nova crescendo
reparabat cornua

Phoebe, nec circumfuso
pendebat in aere tellus
ponderibus librata suis, nec
bracchia longo margine
terrarum porrexerat {10}

Hanc deus et melior litem natura
diremit. Nam caelo terras et terris
absceidit undas et liquidum spisso
secrevit ab aere caelum. Quae
postquam evolvit caecoque exemit
acervo, dissociata locis concordia
pace ignea convexi vis et sine
pondere caeli emicuit summaque
locum sibi fecit in arce. {9}

Sic ubi dispositam quisquis fuit ille
deorum congeriem sectamque in
membra coegit, principio terram,
ne non aequalis ab omni parte foret,
magni speciem glomeravit in orbis. {8}

Tum freta diffundi rapidisque tumescere ventis iussit et
ambitae circumdare litora terrae; addidit et fontes et
stagna immensa lacusque fluminaque obliquis cinxit
declivia ripis, quae, diversa locis, partim sorbentur ab
ipsa, in mare perveniunt partim campoque recepta
liberioris aquae pro ripis litora pulsant. {6}

Iussit et extendi campos, subsidere valles, fronde tegi silvas, lapidosos surgere
montes, utque duae dextra caelum totidemque sinistra parte secant zonae, quinta
est ardentior illis, sic unus inclusum numero distinxit eodem cura dei, totidemque
plagae tellure premuntur. Quarum quae media est, non est habitabilis aestu; nix
tegit alta duas; totidem inter utramque locavit temperiemque dedit mixta cum
frigore flamma. {4}

Ver 4.10 7/5/2019

The archive includes Web
versions with fewer glyphs.

Verajja has a full range of Latin
characters so it can be used for
Pali, Sanskrit, most European
languages, and Vietnamese.

A full Greek character set, and a
wide range of symbols extend its
usefulness to other fields such as
maths and science. Maths and
currency symbols are designed
on the figure width, while other
symbols, arrows, and geometric
shapes are a uniform width and
align with the Caps height
wherever the design permits.

Superscripts Align with Caps,
scientific inferiors₂ bisect the
baseline, and subscripts sit on the
baseline. The default line spacing
for 10 point text is 13 points.

The font includes a wide range
of arrows, symbols and dingbats.
